

# INSTRUCTIONS

## waste collection

### Treatment of masks, gloves and tissues

Masks, gloves and tissues must be kept on board for at least 24 hours in a dedicated bag, before being thrown in the grey bin of household waste.

Caution > It is strictly forbidden to dispose of this sanitary waste at sea, in the voluntary delivery bins, the yellow bins or any place not provided for this purpose.

### Treatment of recyclable waste

On land, you will find bins to deposit your recyclable waste :

- **Glass bin** : only glass bottles, jars and pots.
- **Terminal for packaging** : only cans, beverage cans, aluminium trays and aerosols | Plastic bottles, cans and flasks | Cardboard cans, packaging and overpacks).

This waste must be deposited in bulk, bagless and empty.

### Treatment of household/hazardous waste

This waste must be deposited in bulk, bagless and empty.

Caution > Your hazardous waste must be collected through specific channels :

- You are requested to use the containers dedicated to the collection of your batteries and oils (exclusively) provided by the Marina du Marin ;
- Please, contact your distress flares supplier to drop off your used distress flares ;
- Your other hazardous waste will have to be deposited in a waste collection area as soon as deconfinement allows it.
